

Date of Review/Recommendation: January 30, 2009

Water Body Under Evaluation:

Water Body ID #: 1023
Name: Perche Creek (Class C)
Length of Segment: 23.7 miles
County(ies): Boone and Randolph

Use Attainability Analysis (UAA) Study:

UAA ID #: 0768
Submitter: MEC Water Resources
Date(s) Conducted: September 24 and 27, and October 19 and 29, 2007
Date Received: December 1, 2007
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
☐ 3-Non-Remedial, Human Caused Condition.
☐ 4-Hydrologic Modifications.
☐ 5-Natural Physical Features.
☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☒ Yes ☐ No ☐ Unknown

Comments: The UAA survey was conducted in September and October 2007 and no WBCR was observed. No interviews were conducted during the survey. However, ATV tracks were documented at two sites, and 2005 comments and interview cite whole body and secondary contact uses including: swimming, fishing, and wading.

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The stream met the maximum depth criterion at 1 out of 13 sites evaluated. Due to the stream meeting the maximum depth criterion and documented existing use, the committee recommends the WBCR use designation be retained. Due to secondary contact uses also being documented in 2005, the committee recommends Secondary Contact Recreation be assigned.

Committee Recommendation:

☐ Add Use ☒ Retain Use ☐ Remove Use
☐ Modify Use ☐ Inconclusive
